Zusammenfassung von JP2002067887

**PROBLEM TO BE SOLVED:** To make a diffusion nozzle provided on, e.g. a jet device diffusing and jetting washing fluid on a window screen of an automobile capable of easily changing jet angles. **SOLUTION:** A jet direction variable diffusion nozzle 1 includes a feed back flow pass vibrating and diffusing liquid from a nozzle jet hole in an inner flow pass of the nozzle and a spherical part 6 capable of changing a jet direction of the nozzle in a nozzle base part.
